OBJECTIVE

Software Engineer with 4+ years of experience designing and delivering scalable, enterprise-grade applications. Proven expertise in **LLD, HLD, DSA, React, Angular, .NET, Django, cloud-native architecture**, **CQRS-based API development**, and **CI/CD**. Skilled in leveraging **Generative AI tools** to accelerate development and building AI-driven solutions like **Claim Approval Agents**. Adept at leading migrations, mentoring teams, and driving best-practices to improve performance, security, and reliability.

KEY SKILLS

Frontend: React, Angular, JavaScript, TypeScript, CSS, Styled Components
Backend: C#, Python, .NET, Django
Database: PostgreSQL, SQL Server
Cloud & DevOps: Azure, AWS, Terraform, Cloud Formation Template, GitHub Actions, Consul
Tools & Practices: Docker, Linux, Git, PowerShell, Agile, TDD

EXPERIENCE

Software Engineer | UnitedHealth Group | Sep 2022 – Present

- **Architected and delivered** scalable web applications by developing **15+ dynamic pages** and **10+ forms** for transaction management based on BAI files and complex business rules.
- Designed and implemented **4 SSO-based login modules** and **15+ RESTful CRUD APIs** using **CQRS pattern**, improving authentication workflows and secure data handling.
- **Led migration strategy** for **4 legacy Windows applications** to **Azure-based web apps**, reducing infrastructure costs and improving scalability and reliability.
- Optimized **SQL Server stored procedures** to handle **10K+ data points**, improving query performance by **15%** and reducing latency for critical transactions.
- Automated large-scale repo migration by scripting **400+ Azure DevOps repositories** to GitHub, streamlining version control and reducing manual effort.
- Implemented a **Search Recommendation System** using **Pandas, NumPy, and Scikit-learn**, enhancing user experience and driving engagement.
- Generated **200K+ data points** for realistic testing, improving QA coverage and reducing production defects.
- Designed and deployed **Terraform** for resource provisioning, ensuring reliability and reducing manual effort.
- Automated UI-based application testing using **Selenium Hub**, generating **Extent Reports** downloadable from a single dashboard and auto-emailing stakeholders, saving **70% testing time**.
- Led adoption of **Managed File Transfer** and **CI/CD pipelines** using GitHub Actions, reducing deployment time by **40%** and improving release reliability.
- Introduced **observability and monitoring tools** for proactive issue detection and improved system uptime.
- **Leveraged Generative AI tools** like **GitHub Copilot** to accelerate development and improve code quality.
- **Developed a Generative AI Claim Approval Agent**, automating validation workflows, reducing manual processing time.
- **Mentored junior developers**, enforced coding standards, and drove best practices across teams to improve code quality and delivery efficiency.

Software Engineer | Es Magico Experiences | Feb 2022 – Sep 2022

- **Developed core features** for a web application enabling fractional acquisition of real estate, improving user onboarding experience and reducing onboarding time by **30%**.
- **Built secure APIs** for a hybrid payment application serving **100K+ teenagers**, achieving **99.9% uptime** and processing **$1M+ transactions monthly**.
- **Designed and developed 20+ mobile screens** for a Fintech App using **React Native**, ensuring responsive UI and improving mobile engagement by **25%**.

EDUCATION

- **Master of Computer Applications** | Jamia Millia Islamia | 2019 – 2022 | 8.85 CGPA
- **PGDCA** | Jamia Millia Islamia | 2018 – 2019 | 8.56 CGPA

ACHIEVEMENTS

- Solved **150+ problems on LeetCode** and **200+ problems on GeeksforGeeks**.
- Certifications: **Microsoft AZ-900**, AI/ML for Engineers, AWS (Skill Xcelerator), SQL for Data Science, Machine Learning, AI Dojo (Generative AI ReAct Agent).
